Aarogyam: AI-Powered Health Literacy App

Prof. N. G. Rath

Prit Thombare

Pranav Raut

Aarogyam is an AI-driven personalized health literacy app that simplifies medical information for patients, caregivers, and non-medical users. It offers prescription analysis, automated medication reminders, simplifying user queries, an Ayurvedic chatbot, multilingual support, and first-aid guidance. Built with IBM Cloud, Watsonx.ai, IBM TTS, IBM STT and Flutter, it delivers personalized healthcare insights to enhance user well-being.

Drushti: LVM based Medical Insights Model

Watsonx.ai Studio: To deploy Mixtral-12B using Watsonx.ai Runtime.

Mixtral-12B AI Model: To allow users ask queries based on images (medical reports, prescriptions, etc.)

SANJEEVANI: RAG based Chatbot

IBM GRANITE-13B-CHAT-V2 AI Model: To enable follow up queries (chat).

Watsonx.ai Studio: To fine-tune AI modals with Ayurveda datasets from AAYUSH.

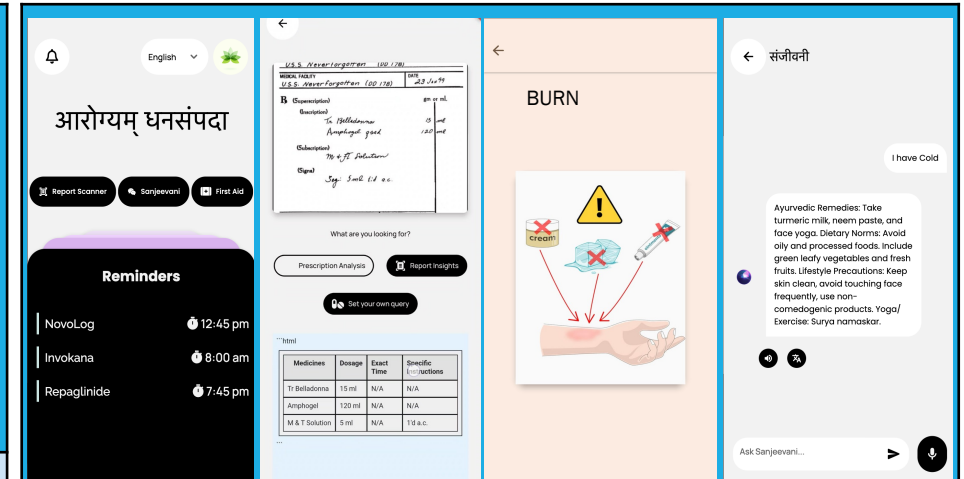

First Aid

IBM Cloud Object Storage Database: To store and retrieve the contents of the first aid guide.

OTHERS

IBM Text to Speech and IBM Speech to Text: To make app user friendly and handsfree.

Watsonx.ai Runtime: To provide the ML instances.

Conclusion: "Aarogyam, powered by IBM's AI and cloud services, bridges the gap in health literacy by simplifying medical reports, automating medication management, and providing Ayurvedic self-care solutions, empowering individuals to take control of their health with ease and confidence."
